

EuroGuard 18

VINYL INNER LAYER SLIP SHEET

EUROGUARD 18

EuroGuard 18 is a vinyl-based slip sheet that may be used as an interleaving carrier between inner-layers. Its surface is moisture and chemical-resistant. EuroGuard 18 can be cleaned and used multiple times. It is available in Red, Blue, and Green. The different colors can be used to identify different processes or priorities during the PCB fabrication process.

Custom colors are available upon request.
Available in .018" (.45mm) thickness.

BENEFITS

- Can be used for inner or outer layer panels
- Reduces damage due to handling
- Clean, fiber-free Vinyl surface
- Surface is water, oil, acid and alkali resistant
- Can be cleaned for multiple uses
- Slows down surface oxidation during "hold times"

MATERIAL PROPERTIES

Colors	Red, Blue, or Green
Surface	Vinyl
Panel Sizes	18 x 24", 21 x 24", other TBD
Thicknesses	.018" (0.46 mm)
