

# EuroGuard 18

VINYL INNER LAYER SLIP SHEET

## EUROGUARD 18

EuroGuard 18 is a vinyl-based slip sheet that may be used as an interleaving carrier between inner-layers. Its surface is moisture and chemical-resistant. EuroGuard 18 can be cleaned and used multiple times. It is available in Red, Blue, and Green. The different colors can be used to identify different processes or priorities during the PCB fabrication process. Can be used multiple times in bake cycles with maximum temperature of 170°F and up to 90 mins.

Custom colors with PMS code designation are available upon request. Available in .018" (.45mm) thickness.

## BENEFITS

- Can be used for inner or outer layer panels
- Reduces damage due to handling
- Clean, fiber-free, non-moisture vinyl surface that will not cross contaminate
- Surface is water, oil, acid and alkali resistant
- Can be cleaned for multiple uses
- Will sustain multiple bake cycles with temperature of 170°F or less
- Slows down surface oxidation during "hold times"

## MATERIAL PROPERTIES

|             |                               |
|-------------|-------------------------------|
| Colors      | Red, Blue, or Green           |
| Surface     | Vinyl                         |
| Panel Sizes | 18 x 24", 21 x 24", other TBD |
| Thicknesses | .018" (0.46 mm)               |
